

# Manish Gaikwad

## About Me

I am a third-year B.Tech student studying Computer Science & Business Systems with a strong foundation in software engineering. I am interested in Graphic design & Digital marketing and aim to contribute to these fields while continuously expanding my skill set. My goal is to work towards solutions that positively impact society.

## Project

### **Weather Based diet system** Time span -7 months

A weather-based diet system adapts food choices to weather conditions. It suggests eating seasonal, climate-appropriate foods, such as cooling fruits in summer and warming stews in winter. It emphasizes hydration and local cuisine, but individual nutritional needs should still be considered. Consult a professional for personalized guidance.

### **Student Data System** Time span -3 months

Student management system using PHP and MySQL is a web-based application. Student Management Project is software that is helpful for students as well as the school authorities. It is very time-consuming and costly. Our online Student Management System in PHP deals with the various activities related to the students.
